TECHNICAL SKILLS

Languages: Java, Python, C/C++, SQL, Ruby, JavaScript, R, Kotlin, Perl

ML/Data: PyTorch, TensorFlow, Keras, NumPy, pandas, Matplotlib, OpenCV, Power BI, ETL, data validation

Systems/Tools: Linux, Git, Docker, Kubernetes, AWS, GCP, Jenkins, CI/CD, Terraform, Splunk, OpenTelemetry, Vector, Temporal, IntelliJ, JetBrains

EDUCATION

Western University

London, Ontario

Honours Specialization in Computer Science | GPA: 3.9

Sep. 2023 – Jan. 2028

- **Relevant coursework/interests:** Operating Systems, Data Structures & Algorithms, Machine Learning, Databases, Computer Vision, Software Engineering
- **Scholarship:** Bennie and Shirley Bradshaw Award in Science; **RBC Design Thinking Program**

EXPERIENCE

Data Engineer, Amplify

May 2026 – Present

Royal Bank of Canada

Toronto, Ontario

- Built an observability platform with **OpenTelemetry, Vector, Splunk, React, Node.js, Puppeteer Replay** that collects, validates, and visualizes product telemetry, cutting the time product owners spend reviewing data from **10 hours** to **1 hour** per week.
- Instrumented end-to-end user flows and turned raw analytics into dashboards, **AI-generated UI insights**, and **wireframes** that surface funnel bottlenecks, projected to drive **50K** new customer acquisitions and **\$7M** in revenue over 5 years.

Software Developer Intern

Jan. 2026 – Apr. 2026

Wealthsimple

Toronto, Ontario

- Built an end-to-end futures report ingestion pipeline for financial services workflows using **Ruby/Rails, Temporal, S3** CSV parsing, ETL activities, SQL-backed validation, and Slack notifications.
- Developed Mark-to-Market settlement activities with **Oracle SQL** self-joins to identify new/existing positions and publish accurate daily P&L entries to the General Ledger.
- Supported production readiness through **on-call rotations**, failed-workflow debugging, and rollout/rollback coordination during a Rails 7.2 to 8.0 upgrade across a 3,400+ file codebase.

Ecommerce and Data Analytics Intern

Apr. 2025 – Dec. 2025

Philip Morris International

Toronto, Ontario

- Created **Power BI** dashboards for third-party partnerships and analyzed eCommerce performance data to support conversion-rate optimization initiatives.
- Conducted UAT for website launches, validating functionality, data capture, and user experience across eCommerce workflows.

Full-Stack Engineer Intern

Apr. 2024 – Jul. 2024

FarmSetu Technologies

India

- Engineered Python/Django features in the Setu Care platform for **10,000+** users, increasing engagement by **20%**.
- Designed and implemented a Visitor Management System, owning backend workflows, UX, onsite deployment, and B2B scalability pitch.

PROJECTS

Computer Vision Performance App | *Python, OpenCV, NumPy*

[Github](#)

- Built a real-time video processing pipeline using HSV segmentation and morphological transformations; optimized frame-level operations for low-latency webcam output.

Blog Application | *Django, Python, SQL*

[Github](#)

- Developed a full-stack Django app with user authentication, CSRF protection, CRUD operations, commenting, moderation, and customized admin management.

EXTRACURRICULAR EXPERIENCE

Cansbridge Scholar

Feb. 2025 – Present

Cansbridge Scholars

Hybrid

- Building a lightweight marketing automation tool for SMBs by conducting user interviews and market research to validate workflows and real business pain points.

Vice President of Community

Aug. 2024 – Apr. 2025

Tech for Social Impact, Western University

London, Ontario

- Led community operations, marketing, and communications for **50+** active members; organized all-hands, sports, and coworking events to increase engagement.

Director of Projects

Sep. 2023 – Apr. 2024

Western Founders Network, Western University

London, Ontario

- Led a team of 4 to prototype **Finity**, a React Native dating app; built navbar, messaging, and profile-edit screens connected to a MongoDB-backed API.
